## Profile

I am an anglo-Australian student studying computer science in Paris. I am currently searching for an internship that could maybe be followed by a job for several months if possible. I am highly motivated and willing to learn and satisfy the needs of your company.

## Education

**Computer Science Engineering** Sep 2021 – Jul 2027

Epita, Villejuif

In my 3rd Semester at Epita in international Section

**International Baccalauréat** Sep 2019 – Jun 2021

Lycée International Jeanne D'arc, Clermont-Ferrand

Subjects I specialized in for my last year: Mathematics, Computer Science. Also followed an advanced mathematics class.

## Experience

**Culturel center of Thiers** 2018

As an intern, I was put on a team of five who were in charge of organizing cultural events. This was my first experience when it came to working as a team in the professional world and taught me the importance of communication and organization.

## Projects

**FPSheesh** Apr 2022 – Jul 2023

Tools: Blender – Unity – C# – Github

A FPS developed in C# on unity.

**OBCERV** Present

Tools: C – Github

Currently Implementing an OCR software in C using neural networks. (Mandatory project that will be completed by June 2023)
